

October 2013

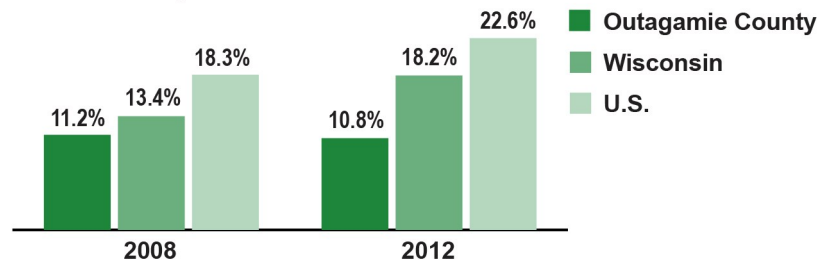

Economic Recovery Slow for Outagamie County Families

More People in Poverty, Fewer with Private Health Insurance

One out of Ten Children in Outagamie County Now Lives in Poverty

The child poverty rate in Outagamie County stayed relatively consistent over the last four years, with a slight drop to 10.8% in 2012 from 11.2% in 2008. Outagamie County's child poverty rate is lower than the statewide average, which rose to 18.2% in 2012 from 13.4% in 2008.

Households in Outagamie County are Making Do with Less

The typical household in Outagamie County earned \$8,100 less in 2012 than in 2008. Median household income dropped to \$48,400 in 2012 from \$56,500 in 2008. A typical household in Outagamie County earns roughly 5% less than the state and national average.

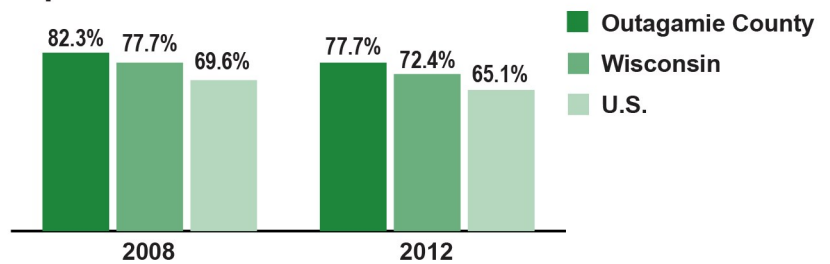

Median Household Income

Fewer People in Outagamie County Have Private Health Insurance

The percent of people in Outagamie County with private health insurance decreased to 77.7% in 2012 from 82.3% in 2008. The increase in the unemployment rate impacted health insurance coverage, since most families obtain insurance through their employers.

Implementing Health Care Reform Could Significantly Improve Access to Insurance

The percent of Outagamie County residents lacking health insurance dropped to 5.9% in 2012 from 7.9% in 2008. Both Outagamie County and Wisconsin had a much smaller share of their population without health insurance than the national average, but far above the 3.9% rate in Massachusetts. That state implemented health care reforms in 2007 that served as the model for the Affordable Care Act.

How to Help Outagamie County Families Affected by the Recession

Families in Outagamie County are still feeling the effects of the recession, when steep job loss pushed many residents into poverty and resulted in the loss of health care coverage. Outagamie County's economic situation is better than the national average, but far too many families are struggling to make ends meet or going without health insurance.

It is discouraging that three years into the recovery, poverty rates and income remain stubbornly low, and the uninsured rate remains high. But there are some basic steps we can take to help boost the local economy and help Outagamie County families pull themselves out of poverty, including:

- Increase the minimum wage and then adjust it each year for inflation.
- Give businesses access to a well-trained workforce by providing schools and colleges the resources they need to prepare

students for employment. And provide students with the financial aid they need to succeed in their educational efforts.

- Adjust the Homestead tax credit for inflation each year, like the rest of the tax code.
- Create a strong public/private partnership to help Wisconsinites get insurance through the Affordable Care Act and to help reach the Governor's target of cutting the uninsured rate in half.
- Maintain funding for safety net programs such as food stamps and federal unemployment benefits that help lift families out of poverty and pump money into the still sluggish economy.
- Increase school readiness by improving children's early learning and development opportunities through high-quality child care, early education, home visiting, and parent engagement.
